BIG UPPA SKY STUDIOS

BUS & SCHOOLS

Creative experiences that help students discover, design, and connect.

Hands-on programs for schools and learning organizations. Students move from an idea to something another person can try, experience, or enjoy.

THREE WAYS TO BEGIN

01 Playtest the Future

From idea to interactive experience

Students build a game or interactive prototype, watch others try it, and use what they notice to make it better.

Introduction, extended workshop, or multi-session project.

02 Creative STEAM Discovery

Try possibilities. Find what clicks.

Students explore building, games, sound, media, and creative technology in small teams, then follow the possibilities that engage them.

Single-session Test Drive or short Discovery Series.

03 Story Bridges

Create across groups and generations

Two groups exchange stories and creative material, then create for and with one another through art, puppetry, performance, sound, or media.

Multi-session collaboration across classrooms or community groups.

BUS IN PRACTICE

Beaver Falls after-school
A Creative STEAM series with Central and Big Beaver Elementary students.

DOVE + Neighborhood North
Students combined characters, voices, music, and digital puppetry in a shared production.

Programs are shaped around your students, goals, space, schedule, and budget. Simple materials can grow into media and creative technology when useful. No previous experience is required.

LET'S SHAPE SOMETHING TOGETHER
